MEGAPRESS® G

CARBON STEEL PRESS FITTINGS

SEALING ELEMENTS: HNBR

OPERATING TEMPERATURE: -40°F TO 180°F

PRESSURE: 125PSI

SCH: 10 - 40

SIZE: ½" - 4"

Viega MegaPressG fittings are a safe and fast way to connect gas pipe. MegaPressG press fittings and valves are easy to install, saving you time and labor, and are compatible with a wide range of approved applications, including natural gas, propane, and fuel oil applications. Viega MegaPressG fittings are the first and only press fitting approved to UL 180 performance standards for the supply of combustible liquid fuel systems.

PRODUCT APPROVALS

UPC®

ICC-ES PMG®

ASME B31

UL 180

 **NOW APPROVED** FOR FUEL OIL FILL & VENT PIPING (NFPA 31/UL180)

PRODUCT FEATURES

- Carbon steel alloy with corrosion-resistant zinc nickel coating
- Sizes and configurations from ½" to 4"
- Can reduce installation time by as much as 60-90%*
- HNBR sealing element for fuels and gases
- Approved for 200 PSI maximum pressure and -40°F to 180°F operating temperatures.
- More application approvals than any other carbon steel press fitting system
- For use with ASTM Schedule 5 to Schedule 40 carbon steel pipe
- Configurations include elbows, couplings, no-stop couplings, reducers, tees, reducing tees, adapters, reducing adapters, unions, caps and flanges
- Connections in 16 seconds or less
- Smart Connect® technology helps identify unpressed connections
- Approved for underground use according to local code

*When compared to traditional installation methods

PROJECT TESTIMONIALS

"It was the perfect scenario for this project. No hot work, and we saved all that weld time... being able to press a joint and move on is a big difference. It made a really nice and clean job."

– Phil Dipaola, Project Manager, Limbach Inc.

"The time it takes with Viega, I can basically do it twice as fast as compared to threading. There are no leaks if you put it in properly, so it's a great product. Way better than anything else."

– Jim McCarthy, Foreman, New England Plumbing

"The first new barn we built has been in operation for about eight months. You can see the gas pipe rusting some – but the MegaPress fittings look brand new!"

– Barry Barnes, Superintendent, Rollins Construction

“

If we'd had to thread this, it would have made things 10 times more difficult, so we would have had to change the installation, plus it would have tripled or quadrupled the labor intensity.

– Steve Schreiner, Owner, Schreiner Mechanical Inc.
