PROPRESS®

COPPER PRESS FITTINGS

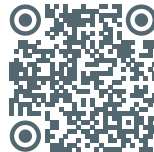

Viiega ProPress is the proven solution for many industrial, commercial and residential projects. With choices in sealing elements, system-matched tools, rings and jaws, press connections are made in seconds, making Viiega ProPress suitable for many standard applications.

- Connections can be made wet or dry for quick repairs on existing systems
- Make secure press connections in seven seconds or less
- Flameless press technology eliminates need for burn permits or fire watches
- Zero Lead solutions certified to NSF/ANSI 61 & 372 (includes Annex G)

SEALING ELEMENTS: EPDM
OPERATING TEMPERATURE: 0°F to 250°F
PRESSURE: 300PSI
SIZE: ½" – 4"

*...how do you make guys
lives easier, well get the right
equipment. And if we can do
that by using Viiega ProPress
...then we're all about that.*

– Mike Caruso, A.C. Plumbing

Viiega ProPress and MegaPress systems are approved for over 2,500 standard and non-standard applications. Visit viiega.us/propress for more information.
